Portfolio: https://vinith665.github.io/PortfolioNew/

Summary

A dedicated and proactive student with a passion for technology and software development. Eager to apply classroom knowledge to real-world projects and gain hands-on experience in the field. Seeking opportunities to contribute to innovative projects and develop skills. Possesses the ability to work collaboratively in team environments and to communicate technical concepts effectively.

Education

B.E. Computer Science
V.S.B College of Engineering and Technical Campus, Coimbatore
CGPA: 8.3/10 2022 - 2026

Higher Secondary (HSC)
Kids Park Matriculation School, Coimbatore
Percentage: 80% 2021 - 2022

Secondary (SSLC)
Kids Park Matriculation School, Coimbatore
Percentage: 83% 2019 - 2020

Technical Skills

- **Languages:** Java, MySql
- **Frontend:** HTML, CSS, JavaScript
- **Backend:** Node.js, Express.js, RESTful APIs
- **IDE:** Visual Studio Code, IntelliJ IDEA
- **Soft Skills**: Problem-Solving, Teamwork, Communication, Time Management, Adaptability

Project

Ecoraiz: The Smart Planting System

Tech Stack: React.js, HTML, CSS, JavaScript
Live Demo: https://ecoraiz.netlify.app/

- Contributed to EcoRaiz: The Smart Planting System, an open-source project.
- Developed the Header and Sign-in page with a responsive and user-friendly interface.
- Maintained consistent design across different screen sizes.
- Collaborated with the team using GitHub for version control and project integration.

Fitness Water Tracker

Tech Stack: HTML, CSS, JavaScript
Live Demo: https://vinith665.github.io/Fitness-and-water-tracker/

- Developed a web-based Health & Fitness Tracker to monitor daily water intake and exercise activities.
- Implemented goal tracking, progress visualization, and personalized health recommendations.
- Created a Java-based weekly summary system to analyze activity trends and track performance.
- Designed a user-friendly interface to encourage healthy habits and support long-term fitness goals.

Brain Tumor Classification

Tech Stack: Python, Flask, CNN, HTML, CSS, JavaScript

GitHub:https://github.com/Vinith665/Brain-Tumor-Classification-Using-Deeplearning

- Developed an AI-based Brain Tumor Detection system using a Convolutional Neural Network (CNN) to classify brain MRI images.
- Applied image preprocessing techniques, including resizing and normalization, to improve model performance.
- Trained and evaluated the model using labeled MRI datasets to classify different tumor categories.
- Integrated the model into a web application to demonstrate the use of deep learning and computer vision in medical image analysis.

Internship

Nocorps

- Successfully completed an internship at Nocorps in Software Testing.
- Prepared and executed test cases to verify application functionality.
- Performed functional, regression, and frontend testing.
- Tested UI components for responsiveness, functionality, and user experience.
- Identified and reported bugs and documented test results.
- Collaborated with the development team to improve software quality.

Certifications

- **Infosys Springboard:** Java Language Features, Java Programming Fundamentals.
- **Oracle:** AI Certified Foundations Associate.
- **Udemy:** HTML, CSS & JavaScript Web Development

Languages Known

- **Tamil** -Read / Write / Speak
- **English** - Read / Write / Speak
- **Kannada**- Speak
